made-to-measure

A HOMESTORY

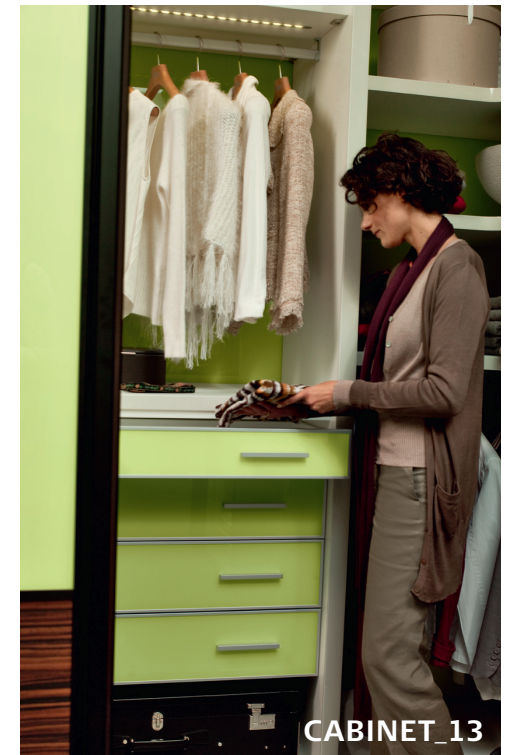

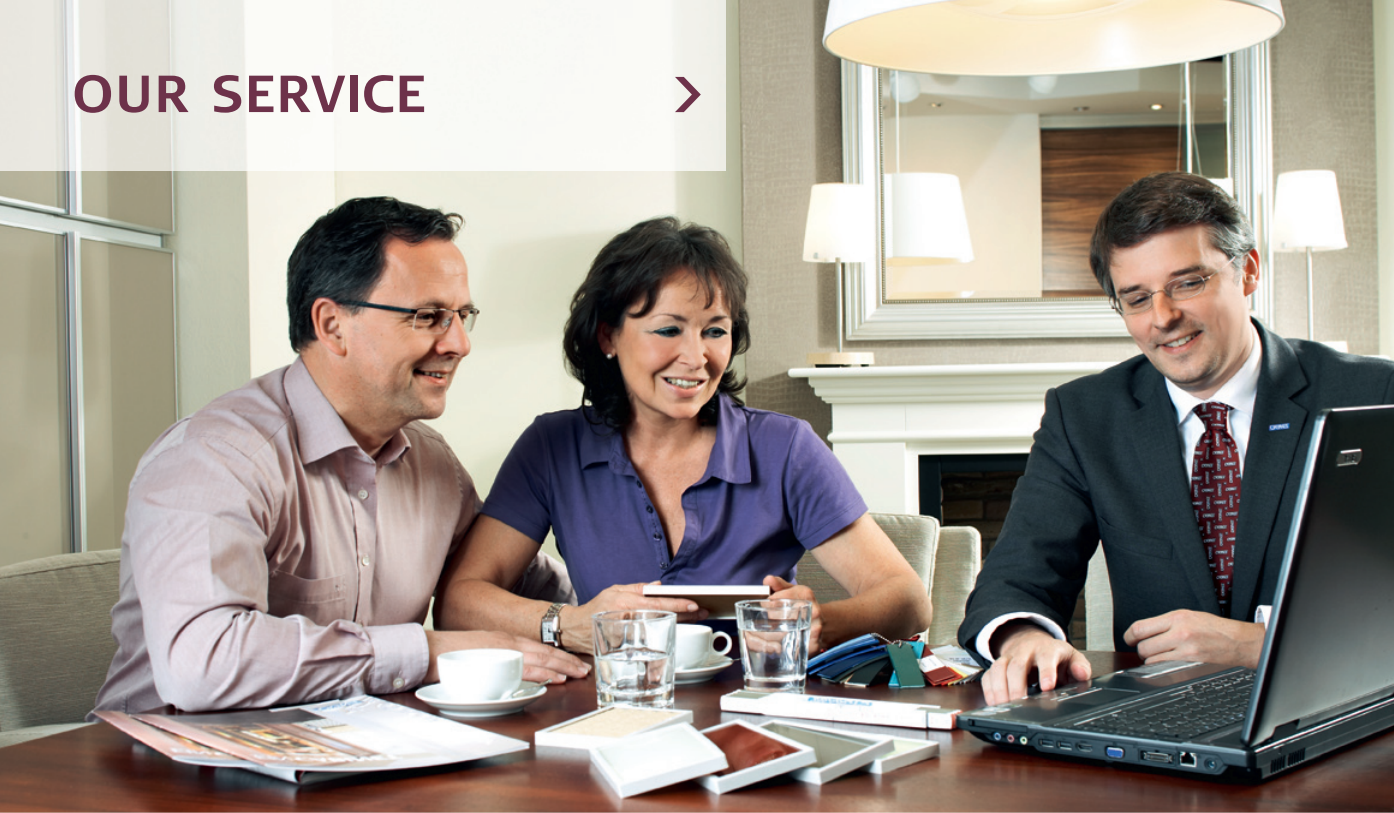

Beautiful, perfectly configured wardrobes such as these put you in a good mood for the day ahead. Nothing is crushed or creased, all accessories are to hand. The interior built across the corner is tailored to offer optimum space for shoes, jumpers and coats. The width of rails, drawers and shoe pull-out units can be determined individually. And glass fronts in a cheerful colour such as lemon yellow in combination with the Macassar ebony decor panels at the base will lift your mood on even the dullest days. You can also choose any other colour for the glass (see p. 82).

Numerous sophisticated details help you keep things tidy: The space-saving pullout trouser unit has been tailor-made, as were the drawers with internal dividers. These can be customised to accommodate ties just as well as jewellery.

The black profiles of the LINEA range offer an appealing contrast to the luminous finish of the glass doors. To add a calming counterpoint, the interior was simply kept white; the drawer fronts pick up the colour of the door surfaces.

OUR SERVICE

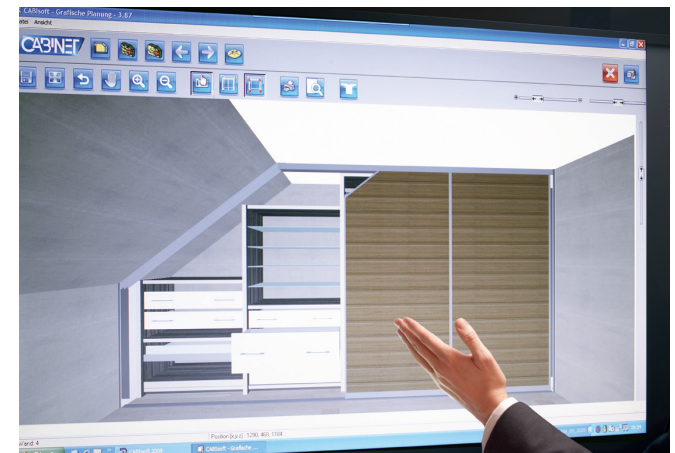

First the consultation: Schedule a consultation at a CABINET partner showroom. It will help if you bring along rough measurements so that we can jointly plan the dimensions of your cupboard, assemble ideas on visual design and speak to you about your wishes regarding the interior fittings.

INDIVIDUAL FROM THE START.

Your made-to-measure CABINET – be it built-in furniture or a room divider – is a personalised project, from initial consultation to assembly at your home. We shall be pleased to show you the great wealth of possibilities. We offer beautiful and intelligent solutions particularly also for small rooms and spaces. You and your wishes are paramount at all stages of the development. Step by step, we will collaborate to create a clear picture: the ideal cabinet, which we shall subsequently manufacture exclusively for you. Of course, made-to-measure manufacture also means that we bear your budget in mind in our planning. Together, we can realise your dream wardrobe.

CABINET_104

A three-dimensional image will appear.
Our proprietary planning program CABISOFT™ allows to visualise your CABINET in a 3-D display. This will give you a visual impression and you will be able to test out different variants.

OUR INCLUSIVE SERVICE TO YOU

Individual advice and collaborative design of your CABINET, professional computer-assisted planning, measurements taken in your home, manufacture carried out at our production facility in Germany, delivery and clean assembly on site at your convenience, plus our 10-year warranty on the roller system.

Accurate measurements taken in your home: To make sure that everything will really fit well, trained staff take on-site measurements accurately and professionally.

Punctual delivery: Although all the components of your CABINET are manufactured separately for you in our production facility, we generally deliver and fit your CABINET within six to eight weeks at the agreed date.

Experienced specialists fit the sliding door systems and interiors on site. That way we can ensure that your CABINET will work perfectly. Assembly won't be signed off until you tell us that everything is in order.
